White Magic EM Heavily ruffled white. L. \$2.00; M. 1.50; S. 1.00; Blts. .40	

PLEASE READ CAREFULLY

ALL STOCK SUBJECT TO PRIOR SALE. Orders under \$2.00, please add \$.15 for handling. All retail orders sent prepaid parcel post in the U. S. A.

Large bulbs are 1¼" and up in diameter and produce the finest show spikes.

Medium bulbs are ¾-1½" in diameter and produce satisfactory bloom.

Small bulbs are ¼-¾" in diameter and sometimes produce small spikes.

Bulblets seldom bloom and are sometimes hard to germinate. Careful peeling of bulblets of expensive varieties pays big dividends.

WE GUARANTEE all bulbs to be true to name, free of disease, and we will replace up to the purchase value of any stock that does not meet this guarantee. We cannot guarantee growth as soil may be poor or infested with disease.

Just a word about our policy. We select bulbs for your order of a quality that we would like to receive if the order were our own.

This List supercedes all those issued prior to Feb. 1950.

NEW COMMERCIAL VARIETIES from ROGER ARNETT

We Have Sold These as Cut-Flowers. We know Their Value!

MODEST DESCRIPTIONS by ROGER

AUTUMN QUEEN (Harvest Moon X Picardy) 416

Quite late. Doubt if it will win many grand championships on the show table. It is a pretty good cut flower for late September or October. Seems to like to bloom from small bulbs and bulblets. Color—golden buff with lots of pink. Spike is too tall and that's a fact. You wouldn't believe me if I should say how high it may be grown. Usually has 18 buds. Number of florets open—too many and they hold too long. 12 open is too many, doesn't take enough spikes to make a basket—to suit the grower. Florists kind of like the idea though and the fact the spikes stay in perfect condition for 2 or more days. It makes more bulblets than is necessary and they grow easier than some people like. Now after hearing all that, if you want to grow it next year and see how badly it is described, you can have it for a price that most of my "fierce" but kindly competitors will say is not enough.

CANDLELIGHT (Chance seed of Gold Dust) 410

This has always been the first Glad to bloom in our Gardens. If it bloomed a week or more later, this Glad would be absolutely worthless. It has always brought the most money as a cutflower because there was nothing else to be had. Last summer it was our only variety that sold for \$1.50 per dozen on the wholesale market. It never has more than 16 buds and only holds 5 florets open. It is a large light yellow. It likes to bloom from small bulbs and bulblets but spikes wouldn't take any prizes at a show. In no sense of the word is this the long sought after "yellow Picardy." This is your opportunity to have the first bloom of the season. As soon as you get enough stock you will really have a chest of gold with Candlelight.

DEEP VELVET (Azalea X Rewi Fallu) 452

If you can use something that will bloom in 65-70 days after planting, then you might try Deep Velvet. Most of the progressive florists welcome this one when they can get it. Don't know why but the general public almost always picks out Deep Velvet. Time after time I have seen them choose this one in preference to others that were introduced at \$25.00 or more per bulb. It will only open 6 florets of its 17 bud spikes at one time. Can't ever remember its crooking and won't average more than 48 inches high in the field. Cuts a pretty good spike at that. Holds its head up after being cut just about as well as any Glad I know. If you want some real "Ohs" and "Ahs" from your neighbors just show them some spikes of Deep Velvet.

Prices on all 3: Bulbs any size, each \$1.00; 10—\$8.00; 100—\$50.00. Bulblets 10—\$1.00; 100—\$8.00; ½ pint \$50.00.

1950 INTRODUCTIONS from BEATON - ORIGINATORS DESCRIPTIONS

We have examined these two varieties in the field. We believe you will like them.

GOLD CHEVRON (Mrs. Hepburn X Mrs. T. E. Langford) 310

A deeply lacinated, needlepointed and lightly frilled light yellow with no other markings. The 3½-4" wide open florets are perfectly placed on a medium heavy and stiff 48" plant, blooming in 85 days and carrying 18 buds on a 24" flowerhead. It will open 7 florets with 6 buds in color. No crooks or short heads. Its full lacination carries an appeal not found in conventional type Glads. As a seedling it received "A" rating at Binghampton '49 and Oregon T. G. '48. It scored 82 in N. J. T. G. '49 and Commendation Awards at Conn., Eastern N. Y. and West Mass. shows '48. Heavy propagator.

TRICOLOR (Mrs. T. E. Langford X Blue Beauty) 378

Here is an odd combination of colors, approaching red, white, and blue. The outer petals are deep pansy violet shading to ivory with ruby blotches. It blooms in 90 days, carries 18 buds and will open seven 3½-4" florets with 6 buds in color on a 22-24" flowerhead. The florets are round, lightly waved and recurved. Excellent substance and perfect placement on medium heavy and stiff stems with an overall height of 48".

Prices on both: Large \$2.00; Medium \$1.50; Small \$1.00. Bulblets 10 for \$2.00. Unit Prices: 1 Lg., 1 Med., 1 Sm., 5 Blts. for \$5.00.

UNLABELED COLLECTIONS

These bulbs are blooming size, recognized Exhibition and Commercial varieties—the finest you can buy at the price.

25 bulbs — Rainbow Mix (our selection)	\$1.75; 100	\$6.00
